

Finestre per la vita

CAMPESATO 1920

CAMPESATO

FROM 1920 TO TODAY

Un'azienda italiana
che ha quasi *100 anni*

partita dal nonno falegname Carlo Campesato nel 1920, per arrivare ad oggi con una veste più moderna del fare il serramento, che è rimasto il know how cardinale sviluppato già a partire da Guido Campesato, padre di Giancarlo e Valter, oggi in azienda con i figli Alessandro e Valentina:
LA QUARTA GENERAZIONE !

Campesato is on the international scene as a dynamic business with a keen eye that builds customised doors, windows and shutters made to measure and catering to the tastes of all different kinds of customers.

An efficient and exclusive **Order Management Software** allows development and control of the entire production process.

All this thanks to the flexibility of a system that makes it possible to construct even complex doors and windows, yet always functional and with the right quality-satisfaction ratio.

But what is really **CAMPESATO**?
Campesato is a company that produces **Bio** ... oriented to **Bio** ..

From the office building where the inhabitants live inside a shell produced by natural elements, where the company produces electricity through the sun that it uses for its own production, helping to reduce co2 production ..

.. where all painting and bonding systems are non-toxic, boasting **INDOOR QUALITY CERTIFICATES**. Which does not weigh on the disposal, where even the old windows and doors are recycled through the reuse of old wood that will give rise to new wood-based products.

...A NEW WOOD FRAME HAS AT LEAST 20 YEARS !

discover
our
world !

"A sustainable future to pass down to those who will come after us with pride..."

*A choice
for life*

"The time of wood is much longer than our time, it is much closer to the time of life than to the time of days, and we know that it stays behind...
with all of its value"

Being passionate about things and crafting them with care has been at the base of the company for three whole generations, during which the wood has borne testimony to the cultural, traditional and future values.

..our future
IS TODAY!!

TRADIZIONE

Woodworking means experiencing nature hands-on, preserving the timeless atmosphere and values of the past.

PER LA VITA

The climate footprint of wood is, and will always be, the ideal solution for man, thanks to the biological balance that only this material can offer.

SOSTENIBILITA'

Producing Campesato wood doors, windows and shutters requires the least possible amount of energy, thanks to the use of wood from silviculture.

SICUREZZA

Campesato doors, windows and shutters have the best strength and safe use characteristics, thanks to the structure and the high-quality components that guarantee top performance.

QUALITA'

QU

The lifecycle of the types of wood Campesato employs is a guarantee to be passed down, as a result of the exclusive, quality choices made from experience.

INNOVAZIONE

Increasingly sophisticated technologies that allow doors and windows to respond to energy certification regulations.

Campesato is

WINDOWS FOR LIFE

Woods and Colours

ENDLESS COMBINATIONS

Our 3 woods are the models that come out wearing our new colors, 36 in the folders ... **but multiply infinitely!**

Every dye is applicable to each of our 3 woods (**Oak**, **Pine** and **RedGrandis**), as well as every effect, making endless possibilities for matching colors, wood and workmanship, creating the perfect tailored dress for you!

THE WOOD COLORS

RED GRANDIS:
the perfect
wood type

The 3 color colori boxes:

- **OUR COLORS:** contains our great classics
- **MACHINING AND EFFECTS:** highlights the elegance of the wood grain thanks to effects such as brushing, poor art, ...
- **EXTRA OPAQUE MACHINING AND EFFECTS:** it reveals the highest naturalness of wood, giving it very high yield, exceptional softness and infinite elegance.

OAK LAMINATE: Excellence

Botanical name: Quercus Robur; Quercus Petraea
Market name: Oak

Oak is a broadleaf belonging to the Quercus genus with the characteristics of robustness and remarkable resistance to scratching. It is used for residential buildings, bridges, barrels, floors, casings, fine or rustic furniture and numerous other things. A choice that "never goes out of style", a favourite for the more elaborate finishes and works.

PINE LAMINATE: Tradition

Botanical name: Pinus Sylvestris L.
Market name: Striped pineo

This conifer has been found in nature since the ice age. Still today, the **Pine** is an extremely versatile wood, used practically everywhere: miscellaneous carpentry, rustic furniture, pellets and wood for heating, etc.

RED GRANDIS LAMINATE: Elegance

Botanical name: Eucalyptus Grandis
Market name: Red Grandis

The term **Red Grandis** is the market name for a certain type of tree that is part of the eucalyptus family. Grown on plantations in Uruguay, **Red Grandis** is a sustainable wood. In fact it comes from renewable plantations, cultivated with certified forest operations.

Our Types

WINDOWS AND
FRANCH WINDOWS

With their peculiar characteristics, **CAMPESATO** doors and windows play their part in imbuing the environments we live in with personality and warmth, even to the point of evoking sensations and emotions from times gone by.

Today they are more in harmony with the furnishings than ever, so much so that they could be considered an essential element.

"Today going back to nature is a need everyone feels. Wood has become the best sign for conveying the concept, because it speaks to us with the words of nature."

download
OUR
REALIZATIONS

Our Types

SLIDING

The range of options available includes models with fixed or sliding doors, on simple or double tracks, which can always be paired with other types of casings that the company produces.

The best expression of **CAMPESATO's** sliding windows is **HSLUCE**, a minimalist alternative for a wide range of all-glass solutions, certified in the highest classes of air/water/wind tightness.

WATER CERTIFICATE
ON SLIDING LIFT:
CLASS 9A (maximum level)

“Wood is one of the oldest products in history, and yet it is only at its dawn.”

Our Types

PIVOTING

The pivoting windows are the perfect balance between functionality and simplicity of the casing, and are the reflection of the modern window.

They distinguish themselves by rotating on either a horizontal or vertical axis. Even windows or French windows with one extremely large glass panel open this way, thus taking up as little space as possible inside.

*“Wood is elegance, is beauty..
Wood is good quality.
Wood is warmth and hospitality.
Wood is history and tradition.
It is innovation and trends.
But above all, it is NATURE.”*

Our Types

FIXED AND ARCHES

641/5000

The fixed glazing systems are ideal for modern architecture: they guarantee thermal and acoustic insulation by giving light to the rooms.

The large windows allow a direct and filter-free relationship between the external and internal environment.

In architecture, the window characterizes the prospectus of each building, giving it a unique shape and character, thanks to arched windows, everything is further amplified:

windows of a thousand and a form that are able to satisfy the most diverse needs: round arches, with pointed or lowered arches, up to the creation of profile curves that adapt to any architectural light.

"Wood is one of the oldest products in history, yet it is only in its beginnings."

Thermal Characteristics

THE TOP IS
OUR STANDARD

The heat transfer values of Campesato's casings are all below the maximum levels allowed for the different climate zones, and are even in line with those required by the "**CasaClima**" project of the province of Bolzano..

download
OUR GLASSES

- Glass $U_g = 1.1 \text{ W/m}^2$
- Solar gain $g = 35\%$

- A hot glass edge guarantees
 - maximum thermal insulation
 - keeping out all moisture

- Frame $U_f = 1.2 \text{ W/m}^2$

Con le caratteristiche del serramento sopra elencate, **CAMPESATO** RAGGIUNGE LA CLASSE ENERGETICA **A**.

LEGEND

U_g = value of the heat transfer coefficient of the glass according to **EN 673**

U_f = value of the heat transfer coefficient of the frame according to **EN ISO 10077-2**

Solar heat gain = ratio between the heat that is given off and allowed to go through the glazing and that which it absorbs.

THE COLORS OF OUR WARM EDGE CHANNELS

SERIES COLORS BY WOOD **E** WOOD/ALUMINIUM:

- BLACK

ONLY ON WOOD COLLECTIONS ALSO AVAILABLE:

White

Ral 7035

Ral 8003

All our channels have the following pluses:

- **ABSENCE OF JUNCTIONS**
- **IN THE CANALINA**
- **CUTTING AT 90 ° IN THE CORNERS.**

OUR GLASSES: endless solutions

All our double glazing units are available in various applications, to be composed according to need:

- EMISSIVES LOW
- ACOUSTIC
- VANDAL
- ACCIDENT PREVENTION
- BULLETPROOF
- SELECTIVE
- BICAMERA

The Security

CUSTOM CLOSURES

ARE YOU SURE THAT YOUR HOME IS REALLY PROTECTED BY THEFT ATTEMPTS?

The alarm system alone is not enough to stop a thief:

- it is off when the owner he is at home;
- often sounds when the thief has already entered the house;
- it is subject to false alarms.

TES RC3
CAMPEATO

JUST FOR YOUR SAFETY YOU CAN CHOOSE BETWEEN
3 SAFETY LEVELS:

Standard safety
START

Recommended minimum level for windows in your own home; suitable only for windows that are difficult to reach.

**RC2
PREMIUM security**

Suitable for urban contexts and in any case not isolated; protects doors and windows easily attachable with space-saving tools.

**RC3
ARMORED security
with POSEIDON TT**

Designed for those seeking maximum safety in isolated contexts; ideal for doors and windows easily attachable with bulky tools.

Our Certifications

OUR ADDED VALUE

We have reached performances that top certification standards **many years before they were defined as applicable law.**

■ Test report: SLIDING WINDOW

The sliding **CAMPESATO** window with two sliding panels reached the maximum seal threshold, the only window in its category to achieve these results.

Certificated by 

WATER-BASED CERTIFICATE ON SLIDING LIFT:
CLASS 9A (maximum level)

■ Waterproofness (UNI EN 1027 – UNI EN 12208)

CAMPESATO ACHIEVED **CLASS 9A (MAXIMUM LEVEL)**

■ Airtightness (UNI EN 1026 – UNI EN 12207)

■ Burglar resistance (UNI ENV 1627 – UNI ENV 1630)

■ Mechanical properties (UNI EN 12046-1, UNI EN 14608, UNI EN 14609, UNI EN 947, UNI EN 948, UNI EN 949, UNI EN 950, UNI EN 1192, UNI EN 13115)

■ Sound insulation (UNI EN ISO 140-3, UNI EN ISO 717-1 – UNI EN 14351-1)

■ Class of Resistance RC3 Campesato reaches a new record: is **THE FIRST ITALIAN COMPANY** to certify the window in RC3 resistance class even on a wood other than oak: the **RED GRANDIS**.

10 years guarantee
QUALITY AND DURABILITY

Our company has always been mindful of issues related to **environmental and user safety**; we have thus decided to conduct research on extremely pure and technologically advanced painting products to meet the highest indoor safety standards.

This objective has been achieved thanks to **Remmers**, the most prestigious and important manufacturer of door and window paints in Europe, which guarantees:

- **absence of hazardous chemicals for humans**
- **air quality indoors**
- **the same health level which is used for paints on children's toys, certified according to the EN-71/3 standard (heavy metal migration).**

With this technology our products have been made healthier, by using substances which have been awarded the most prestigious voluntary certifications for health and safety.
